

DHL

ME&R Service and Maintenance

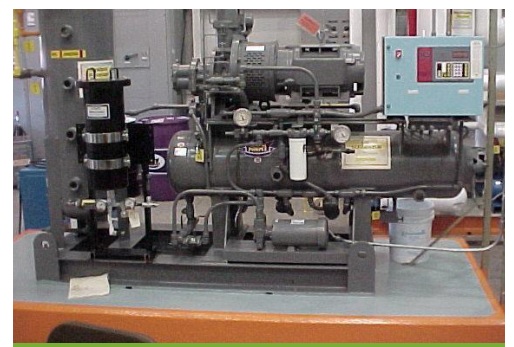

Business Relationship - Overview & Typical Scope of Works

Carter Synergy provide planned and reactive maintenance to numerous DHL Supply Chain and subsidiary company sites across the UK.

The range of plant and equipment maintained reflects the full scope of work carried out by this key Global logistics provider, from prestigious offices in the City of London to pharmaceutical sites requiring close temperature & relative humidity / environmental control in large & extensive storage facilities. Assets serviced include split A/C , VRF Units, Coldrooms, Chilled Water Systems, AHU's and all related BMS Systems.

As an annually assessed & proven "Tier One" "business critical" service provider to DHL & their wholly owned independent subsidiary companies; Carter Synergy is the first point of call for DHL when Mechanical, Electrical, Heating, Ventilation & industrial Refrigeration service, maintenance & capital projects are required.

Carter Synergy also deliver turnkey projects for DHL extending beyond ME&R requirements and any other need including, but not limited to, building fabric, BMS Systems, Fire protection, Fabrication, Access / Security Systems
