

UNIVERSITY HOSPITAL WALES

Ventilation Service & Maintenance

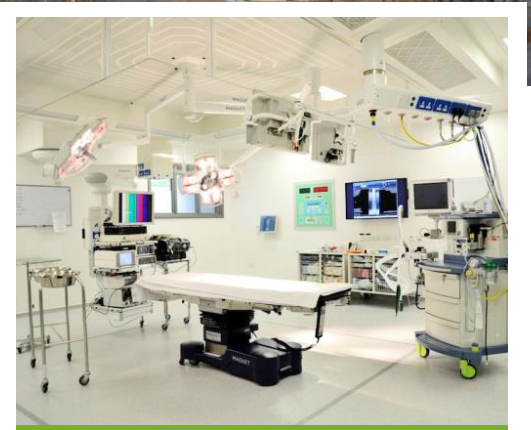

Contract Overview & Scope of Works

Carter Synergy provide planned and reactive maintenance to all ventilation systems including to critical medical areas that rely on the highest standard of air hygiene such as operating theatres and high dependency wards.

The contract provides two full time residential engineers and is supported from the Carter Synergy extensive National pool of >300 mobile engineers to provide assurance of supply, resiliency of critical services through technical excellence.

Approximately 300 air handling units of vastly varying duty, complexity and criticality are serviced across 11 sites in the South Wales Region.

Carter Synergy also delivers “managed” air & water hygiene analysis and consultancy through the wider Carter Thermal Industries wholly owned subsidiary company CEE (Carter Environmental Engineering).
